# How to Create a Parent Account in Schoology

- Go to Schoology.com, click on Sign Up and choose Parent

- Enter in the Access Code provided by your student's school

- Fill out the information to create your account - the username and password you choose now will be what you use to log in moving forward

- Once you log in, you'll be able to browse your student's activity by clicking the arrow on the right of your name and selecting your child's name from the top right drop-down menu

- You also have the option to associate additional students using Schoology with this account. To associate additional children, click the down-facing arrow in the top right of your Schoology account, select Add Child, and enter the Parent Access Code of your other student
